

## ENVIRONMENTAL AND PRODUCT SAFETY DATA SHEET

### **Product**

Antique candle

### **Raw Material**

70% Stearin  
30% Paraffin

### **Additives**

Cotton wick

### **Packaging**

Inner: Carton Board  
Outer: Corrugated Board Box

### **Field Of Application**

For indoor use to create an atmosphere.

### **EC Directive 94/62/EC on Packaging and Packaging Waste**

The packaging complies with all essential requirements as defined by 94/62/EC. For example minimum adequate amount of packaging, limitation of heavy metal content, recyclable through at least one of the following: reuse, material recovery, energy recovery or composting.

### **Environmental Aspects**

#### **Product**

Stearin is a renewable raw material originating from animals and plants. Paraffin is a by-product from the production of fuels from crude oil.

#### **Packaging**

The corrugated board used for outer packaging is unbleached and is to a substantial part made of recycled fibres.

### **Product Safety**

- RAL-Certified
- Duni manufacturing units are certified according to the international quality system ISO 9001 and 9002. They have also implemented or will implement the environmental management system ISO 14001.
- To handle the candles in a proper way follow the instructions on the candle pictogram.

### **Management of Used Products**

#### **Energy Recovery**

All the materials are suited for energy recovery. Complete combustion gives mainly rise to carbon dioxide and water. The energy content of plastics/paper is comparable to that of oil/ wood.

#### **Recycling**

Recycling of the plastic and the corrugated board is possible for producing new products. Check with the local recycling company.

### **Validity**

This is a copy of a document issued 2011-01-13. It is normally updated every second year or when there is a change in the manufacturing process, in the product or in legislation. To make sure that you have the latest edition, contact Duni AB, Environmental Affairs.
